L. B. KERR & CO.,
LIMITED.CONTRACTS
ARE MADEHarbor Dredging
Will Begin
Soon.CHANNEL TO
BE DEEPEMEDDay Contracts Made by Boyd
With Cotton Bros and Ha-
waiian Dredger Co.

The contracts for dredging Honolulu harbor in anticipation of the early coming of the big Pacific Mail steamers were let yesterday by the Public Works Department. For dredging the slip at the new Hackfeld wharf Cotton Bros. were given the contract, and they will also dredge the harbor between that wharf and the Oahu Railway Company wharf.

For cleaning out the harbor proper to a uniform depth of thirty feet the Hawaiian Dredger Company was awarded the contract by Superintendent Boyd of the Department of Public Works. The total expense for the entire improvement is not to exceed \$20,000, the amount allotted for the work by the Executive Council at a recent meeting. The work is properly the duty of the United States government, but as its necessity is immediate, and no appropriation could be secured from Congress probably for months, it was decided not to wait as the Korea and Siberia are expected in Honolulu within a few months, and shipping would be seriously crippled while waiting for the national government to act.

Under the contract made by Superintendent Boyd yesterday the work is to be done under the supervision of the Public Works Department, and Engineer G. H. Gere will have direct charge of the dredging.

By the terms of the contract the dredging firms are to furnish all labor, machinery, material and bear all expenses of any kind. For dredging the slip Cotton Bros. will receive \$11 per hour, the job to be performed by the day, and the work to proceed as rapidly as is possible. The Hawaiian Dredger Company, for dredging the channel, will be paid at the rate of \$12.50 cents an hour, all supplies, labor, etc., required, to be furnished by the contractors. The Public Works Department simply has a supervising control of the dredging, and will place men in charge of all work, to see that the terms of the contract are carried out, and that there are no unnecessary delays. The work must begin by the first of the coming month, and the contract should be completed within a few months. Superintendent Boyd believes that by this method the dredging will not only be completed in a shorter space of time, but it will be more economical in the end. The appropriation for the work is \$20,000, and this he expects to cover all expenses connected with it.

When the channel is dredged it will be possible for the largest ship to maneuver successfully within the harbor lines, and the Wisconsin or any of the big vessels would have not the slightest difficulty in making the wharf. The dredging of the slip will allow a vessel to lay along either side of the new Hackfeld docks when completed. The harbor will have a uniform depth of at least thirty feet from the Inter-Island wharf at the foot of Fort street to the end of the harbor.

The harbor will then form a big basin in which the largest vessel can float. Soundings of the harbor were made several months ago, and in some places a depth of but ten to fourteen feet was found. Even the transports have had considerable difficulty lately in getting up to the wharf, while Admiral Casey found it altogether impossible to even attempt to bring the Wisconsin within the harbor. Upon the completion of the improvements there will be no difficulty for any vessel whatever her size, to enter the harbor, and to turn within its confines.

TOOK A WHEEL OFF.

Japanese Hack Collides With a Brake
and Damages it.

A Japanese hack and a brake belonging to the Oahu Carriage Company figured in a collision yesterday afternoon Ewa of the King street bridge, resulting in a damaged wheel to the latter vehicle. The Japanese hackman was driving toward the depot, oblivious to the pace of his horse, the blank look on his face indicating that he was thinking more of the figures of his bank account than of the crowded state of the street. He suddenly collided with the brake, taking off one of its wheels. He was not disconcerted when the angry proprietor of the brake said he would sue him for damages.

"All right; me no care," was the careless answer. The Jehu's hack number was jotted down, and he was allowed to depart.

OVER THE TEACUPS.

"Milton had an ill-tempered wife," he said, "and she finally left his house."
"Yes, dear," replied his wife, "and when she was gone he wrote 'Paradise Lost.'"

A Broad View When a person photographs a wide building, a large group, a range of mountains, or a landscape or marine scene, he should have a broad view, which an ordinary camera does not afford because its vision is limited to about 60 degrees in extent. For this reason the

AL VISTA PANORAMIC CAMERA

Is the only practical camera for scenic photography. Its vision of 180 degrees, which the SWINGING LENS affords, enables you to include ALL of the widest scene in a single picture—something which no other camera can do.
